Question No : 50 of 52 Marks: 5 (Budgeted Time 10 Min)

Suppose an application has a window and 2 menu resources, one is IDM_MENU1 and second is IDM_MENU2. While registering the window class in this application, we make IDM_MENU1 the class menu. Now, we have 2 scenarios:

0. We give the menu handle of IDM_MENU2 during creating the window.
1. We give NULL as the menu during creating the window.

You have to tell which menu will be associated to the window in both cases.

Question No : 52 of 52 Marks: 5 (Budgeted Time 10 Min)

I have a server and client program on the same machine. The server is part of an application- it can start and stop arbitrarily. When the server is up, I want the client to connect to the server's listening socket. There are win32 functions to wait on file system changes (ReadDirectoryChangesW) and registry changes (RegNotifyChangeKeyValue)-

Write the names of related APIs that we need to use to solve problem.
