### TH302 - Business Mathematics & Statistics (Quiz 03)

Question # 3 of 10 (Start time: 08:00:11 PM, 16 February 2022)

The following results were obtained from a simple regression analysis:

$$y = 37.2895 - 1.2024 X$$

$$r^2 = .6774 \quad s = .2934$$

----- is the proportion of the variation explained by the simple linear regression model

Select the correct option

- 0.6774
- 0.2934
- 1.2024
- 37.2895

MTH302 - Business Mathematics &amp; Statistics (Quiz 03)

Question # 10 of 10 ( Start time: 11:35:16 PM, 19 February 2022 )

The syntax intercept (known y's, known x's ) gives

Select the correct option

- |                       |                             |
|-----------------------|-----------------------------|
| <input type="radio"/> | a)x- intercept              |
| <input type="radio"/> | c)Both (a) and (b) are same |
| <input type="radio"/> | b)y- intercept              |
| <input type="radio"/> | d)None of these             |

Question # 7 of 10 ( Start time: 11:40:45 PM, 19 February 2022 )

Standard deviation can be calculated by taking deviation from any measure of central tendency

Select the correct option

False

True

**Question # 5 of 10 ( Start time: 11:26:52 PM, 19 February 2022 )**

For the regression line:  $Y = -X + 5$ , y-intercept is

Select the correct option

- |                       |    |
|-----------------------|----|
| <input type="radio"/> | -5 |
| <input type="radio"/> | 5  |
| <input type="radio"/> | -1 |
| <input type="radio"/> | 1  |

**Question # 6 of 10 ( Start time: 11:28:20 PM, 19 February 2022 )**

If  $S_x = 2.56$ ,  $S_y = 15.91$ ,  $S_{xy} = 29.59$ , then correlation Coefficient is

**Select the correct option**

<input type="radio"/>	0.649
<input type="radio"/>	0.3880
<input type="radio"/>	0.7265
<input type="radio"/>	.6744

## MTH302 - Business Mathematics &amp; Statistics (Quiz 03)

Question # 1 of 10 ( Start time: 11:29:45 PM, 19 February 2022 )

Which of the following is not a necessary condition for regression analysis?

Select the correct option

- |                       |   |
|-----------------------|---|
| <input type="radio"/> | The Y values are independent.   |
| <input type="radio"/> | The slope of the regression line is positive (increasing).                                |
| <input type="radio"/> | For each X value, there is a group of Y values and these Y values are normally distribute |
| <input type="radio"/> | The standard deviation of each of the conditional distributions must be the same.         |
